

Smart Water Solution Pack

Coordination across metering, dispatch, leakage, and revenue operations.

- Frames smart water work as a connected operational and revenue program.
- Brings together meter reading, dispatch data, leakage insight, and customer service.
- Useful for both the main smart-water page and the revenue command extension.
- Provides a substantive local file for seeded solution downloads.

Curated local solution pack for Bigfoot seeded content.

Scenario Coverage

Example workflows represented by the pack.

- District monitoring linked to dispatch and customer notifications.
- Revenue command dashboards with billing, collection, and anomaly review panels.
- Field coordination for meter tasks, repairs, and verification cycles.
- Migration-safe local assets keep tests independent from network conditions.

Task 6 upgrade: richer seeded solution attachment content.
