

Case Study Overview

Revenue digitalization patterns for the Zhongshan utility example.

- Shows how billing, reconciliation, and service workflows can share one operating view.
- Captures the migration-safe local file used by /cases/zhongshan-water.
- Gives the seeded case page a real downloadable artifact with meaningful content.
- Also supports the related Foshan billing case in the current seed set.

Curated case pack for public case-study downloads.

Transferable Practices

Patterns reusable across utility revenue modernization programs.

- Phase in new workflows without breaking staff visibility into exceptions and arrears.
- Expose reconciliation quality, customer response, and collection progress on one dashboard.
- Plan training for service centers, auditors, and finance operations together.
- Keep case-study documents local when remote sources do not match declared file types.

Task 6 local case asset refresh for seeded content quality.
